DEPARTMENT OF EDUCATION AND CHILD STUDY

"Children are a challenging combination of realism and imagination. The paradox is one of the fascinations of childhood. It is also a problem for parents.

"No parent needs evidence of a child's realism. All of us have often been jolted by a youngster's simple, questioning 'Why?'

"Isn't it this realism which makes the child's own real world of fantasy so alive, so actual? Children never consciously transform fantasy to fact. In their minds, children are never 'playing'. They are living.

"Toys are the things children live with. Their toys people their particular, personal world.

"So toys should be chosen to help children live, in this world where living means playing. Toys should be fuel that helps set their imaginations afire. Toys should help teach children to think, to *make*. Toys should help them to develop skills. Toys should be *fun*.

"Selecting toys wisely is a grown-up responsibility. Always choose toys best-suited to the child's age, interests, and imaginative growth. Choose toys the alert child will respect—well-made toys that will withstand the hard usage of hard-playing children.

"Good traits are developed when good toys are enjoyed. Good toys can be basic building blocks in creating good character."

Sincerely yours,

Seth Wakeman

A 3-37 LABYRINTH GAME Ship. wt. 5 lbs. **8.50**
(6 yrs. up)—A popular Swedish game now made available here. It consists of a boxed-in playing surface 9 x 11" on which a winding line is drawn to indicate the path over which a small steel ball must be made to travel by tilting the surface either way by knob control. But the path is crossed by road blocks and the surface is full or strategically located holes. The player completing the course in the shortest time wins—a ball lost down a hole requires a fresh start. A quality game made of clear lacquered pine. One of our biggest items.

B 3-85 ELECTRO-MAGNETIC FOOTBALL Ship. wt. 9 lbs. **8.95**
An action football game that leaves little to the imagination. The players race over the green masonite gridiron from any formation, and the ball is actually kicked and passed. The steel grandstands have built-in scoreboards. Included are 22 plastic players, 2 snap-action kicker-passers, 2 magnetic balls, goal posts, yardage marker, numbers for players and rules. Metal frame is 15½" x 28" x 3" overall. 110V AC only.

C 42-30 PRO HOCKEY (Imported) Ship. wt. 13 lbs. Express only **14.95**
A fast, exciting game in which any of the individual players can drive the steel ball into the opponent's goal. Unless, of course, good defensive play moves the goalie to block the shot. The realistically decorated masonite rink is 36" x 16" and is set into a wood frame 4" high. Players manipulate knobs to make players shoot. Goalie slides back and forth to protect entire goalmouth.
